Applicant's amendment dated December 20, 2004, has been fully considered.

Applicant has amended the claims to overcome the 101 rejection. However, a new ground of rejection based obviousness double patenting rejection has been made.

This Office Action has been made final.

Claims 1-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. US 6619041. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

US 6619041 recites all the claimed subject matter except for the newly added limitation including the double wall structure. It would have been obvious for a person having ordinary skill in the art to modify the engine in US 6619041 to have double wall structure as claimed for the purpose of increasing the strength of the wall.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double
